Quantum Artificial Intelligence, S.L.

- ...
Private company from November 2020 but with experience since 1991 in markets and economy.
Aim: to contribute to offer business intelligence in economy, market, distribution channels with use of high technologies like Artificial Intelligence and Quantum Computing.

We work with private companies, social entities, public entities to increase your business.

Main expertise and capacities

I am
CELISE

- Generative models
- GPT
- How a generative model of language is able to acquire world knowledge and process long-range dependencies by pre-training on a diverse corpus with long stretches of contiguous text.
- GPT-2
- Generative Pre-trained Transformer 2, commonly known by its abbreviated form GPT-2, is an unsupervised transformer language model and the successor to GPT.
- GPT-3
- Generative Pre-trained Transformer 3, commonly known by its abbreviated form GPT-3, is an unsupervised Transformer language model and the successor to GPT-2.
- GPT-3 succeeds at certain "meta-learning" tasks. It can generalize the purpose of a single input-output pair.
- GPT-3 dramatically improved benchmark results over GPT-2.....

Interests in CELISE

I am
CELISE

- Best and simple characterisation business models and methods
- Best way to execute profitable solutions in these areas
- Artisan sector collaboration and partners
